Dear Feng Qi,

Attached is an electronic copy of your paper. I cannot explain what happened. We cannot remove it from our website.

Dear Editors

Although I withdrawn the following paper, but you published it recently. Since so, could you please send me an electronic copy of the following formally published paper? If possible, please remove this paper from your journal's website.

Hong-Ping Yin and Feng Qi, *Hermite-Hadamard type inequalities for the product of (α, m) -convex function*, Missouri Journal of Mathematical Sciences **27** (2015), no. 1, 71--79; Available online at <http://projecteuclid.org/euclid.mjms/1449161369>.

Best regards

Feng Qi (F. Qi)

Dear Editors

Due to the known reason for us, I now decide to withdraw my joint manuscript from your side. In other words, I would not like to publish the following paper in your Missouri Journal of Mathematical Sciences.

Happy New Year.

Best regards

Feng Qi (F. Qi)

Dear Editors

Just now I found that my accepted paper jointed with Ms. Hong-Ping Yin and titled "Hermite--Hadamard type inequalities for the product of (α, m) -convex functions" was not formally published in the issue 2 in 2014 of your Missouri Journal of Mathematical Sciences yet.

Would you like to formally publish the above paper? When would you formally publish it in your Missouri Journal of Mathematical Sciences?

Merry Christmas and Happy New Year.

Best regards

Feng Qi (F. Qi)

Dear Colleagues

I knew you denied my waiving request. My coauthor was ever supported by her university as a younger teacher several years ago. But the support fund was small (just about 5000RMB) and she has used up the money quickly. As for me, currently I have no any fund support. Moreover, when I submitted the manuscript, I was not acknowledged about the publication charge. Therefore, we wish you may waive the publication charge this time.

Best regards

Feng Qi (F. Qi)

Professor Qi,

If you will please refer to a previous email from Dr. So dated September 3, 2013 regarding the request for page charges to be waived. In that email Dr. So stated

that the MJMS Board had denied your request. Please see below.

Please make payment to page charges at your earliest convenience.

Thank you so much.

Dear Professor Qi,

I have presented your request for waiving the paper charges of your paper titled "Hermite-Hadamard Type Inequalities ... Convex Function" to the MJMS Editorial Board. I regret to inform you that the Board did not approve your request based on the fact that your research was supported by the Foundation of Research Program of Science and Technology at Universities of Inner Mongolia Autonomous Region.

Regards,

Shing So
Coordinating Editor
MJMS
